

Changing Outgoing Email Accounts within Outlook Express

1. Open Outlook Express.
2. In the upper left corner below File click "Create Mail" to create a new mail message.
3. A new window will open. In the third area from the top (just above the "To" line) note the "From" drop-down-menu. Clicking the arrow on the far right drops a menu showing all of your Email accounts. Click on the one you wish to ship from.

4. The account you have selected will be displayed on the "From" line, above the address you intend on sending the email to.
